It's up to you to attach data sources in this sheet. Please enter the data that you wish to analyze and show in your model. If there is no data, there will be an error message in the cell. In this sheet you can also enter the name of your model, using the "Model" parameter you can choose the one you have created in this tutorial. The "Ask for help" parameter allows to save the model in a template you can reuse, using this sheet as a template. The "Ask for help" parameter allows to save the model in a template you can reuse, using this sheet as a template. Read more about this parameter here. The "Ask for help" parameter allows to save the model in a template you can reuse, using this sheet as a template. Read more about this parameter here. The button below the parameter allows to apply the model. The button below the parameter allows to apply the model. If you have any doubt about the steps in this tutorial or want to learn more about how to run machine learning model, then please visit our main tutorials page. Please note that you will need to run all the examples yourself, unless you have a paid subscription to Kaggle Notebooks,

in which case you will get the notebooks from our library and get access to all our tutorial notebooks, including this one, at no extra cost. You can find the API documentation [here](#) and the full list of supported programming languages [here](#). How to download this tutorial If you are using Google Colab Notebooks: Copy the code from this tutorial into Colab Notebooks directly by clicking on the first cell in this tutorial and then copying and pasting the code from that cell. If you are using the Kaggle Notebooks directly: download the notebook from [here](#). If you have access to Kaggle Notebooks, please use this notebook as a template to download it in the "Ask for help" parameter. After the data is imported, a notebook is automatically opened in your browser. You will notice that the first cell contains some comments to explain the tutorial. The rest of the cells in this tutorial contain the code and description of the different steps. If you have questions or want to get in contact with us, please use the comments below the tutorial or email us at support@kaggle.com. We can't wait to see what you build!
